To facilitate selling and make it convenient for home owners to select and take along plants when visiting our nurseries, we maintain a Sales Department where choice freshly dug plants are available and on display.

We have an excellent stock of bearing-age Fruit Trees, Berry Bushes, Grapes, Rhubarb, etc.

Flower and Vegetable Seeds, Lawn Seed, Fertilizers, Insecticides and Garden Sundries are stocked for your convenience.

LANDSCAPE SERVICE

Artistic and satisfactory landscape effects are the result of careful planning and the proper use of the right material.

Why not consult us about your landscape problems? Suggestions and advice will be gladly given.

GUARANTEE

(In conformity with uniform guarantee as adapted by National Landscape Nurserymen's Association.)

Provided account is paid within 30 days, and plants have received reasonable care and protection, we will replace at one-half original cost all woody plants furnished and planted by us which fail to survive one growing season. Guarantee does not apply in cases of loss due to drought, severe winter, storms, insect injury, or factors beyond our control.

If plants to be replaced are out of stock, credit will be applied to other plants.

PLANTING

The cost of planting, if we do it, is borne by the purchaser. Our charge merely covers the cost of labor, fertilizers, etc.

DELIVERY

On large orders, where they can be combined, we intend to give free delivery within a radius of 30 miles from our nursery. On smaller orders a nominal charge for delivery will be made unless otherwise arranged at time of sale.

Ornamental and Shade Trees

IN ADDITION to the trees which are valued for their shade, there are flowering trees which, at different times during the spring and summer, shower the lawn with their bloom. Do not forget that while shade trees add materially to the property value and landscape charm of your home, the initial cost is very small as compared with the enjoyment that you receive. The average shade tree is a long investment and returns your money manifold throughout the years of its usefulness.

The abbreviation "cal." means the caliper or diameter of the tree 6 inches above the ground.

Flowering Shrubs

WHETHER planted individually or collectively, shrubs are an important feature in the adornment of any grounds. In groups they can be made to emphasize some feature of the lawn, to screen the garage, the laundry-yard, or some unsightly view. Among borders of the lawn, along walks and drives and in corners, collections of shrubs may be gathered that will give a succession of bloom from early spring until fall. In the list that follows will be found shrubs for all such purposes.

Prices for Shrubs, except where otherwise noted:

	Each		Each
2 to 3 ft.....	\$0 85	5 to 6 ft.....	\$2 00
3 to 4 ft.....	1 00	6 to 7 ft.....	2 75

A Few Practical Hints on Planting

- Always keep roots covered when plants are out of the ground.
- Dig hole large enough to receive plant without bending roots.
- Break up subsoil and mix it thoroughly with rotted stable manure.
- Set plants slightly deeper than they stood at the nursery.
- Work in good soil among roots so as to leave no air-pockets.
- Fill hole and tamp soil down thoroughly with the heel of shoe.
- Leave slight depression around plant to catch the water, and water thoroughly.
- A booklet with more detailed planting instructions will be gladly sent upon request, free of charge.

Ilex crenata (Japanese Holly Hedge). See page 21.

Broad-Leaf Evergreens

WITH few exceptions, no grounds, either small or extensive, should be without some representative of this rich and interesting group of plants. They endure shade, and their rich blossom and foliage effect makes them almost indispensable. Certain varieties of this class, such as Rhododendrons, Azaleas, and Laurel, ordinarily grow more satisfactorily and show to better advantage when planted in rather heavy masses. A deep, cool, moist subsoil, with proper drainage, is ideal. As a rule, they dislike lime, or limestone soil, and success will be more certain on such soils if they are planted in woods earth or mulched with peat moss. Oak leaves are ideal for covering the ground beneath them.

Evergreens

IN THIS group are contained some of the most valued plants for landscape effects. The diversity of color and habit of growth in this class provide truly "a plant for every place and purpose," some for limited areas of foundation plantings or for bed and border uses, others for screens, hedges, windbreaks, and for group and specimen plantings. They are always desirable for both summer and winter effects.

ABIES • The Firs

Increases Property Value

Beautifying your home grounds is an investment which pays immediate dividends. The moment you set an ornamental or fruit tree, a shrub, plant or vine, your property becomes more valuable and desirable. Real estate dealers have estimated that the addition of a few trees and shrubs in a new subdivision often increases the property value 20%. Most things depreciate from the minute of purchase. Planting is one of the few investments that *do not depreciate* but bring *increased* returns in actual value and satisfaction.

Evergreen Hedges

From time immemorial people have used hedges and fences to protect their property from intrusion and to secure privacy.

ARBORVITÆ

Pyramidal. Because of its shapely habit of growth and deep green foliage, this makes a very fine hedge.

A Safe Investment

Planting is one of the few investments which do not depreciate. It always brings increased returns in actual value and satisfaction. Shade trees, ornamental trees, and flowering shrubs create value that increases the worth of a property at least 20%. The return is immediate and it increases every year.

TAXUS • The Yews

Without question, the Yew (*Taxus*) in its various forms is the outstanding evergreen for use on the home-grounds and in general landscaping, for its dark green, rich-textured foliage is always fresh-looking and attractive. It is extremely hardy, not affected by cold or heat, and will grow in shade as well as sun. A slow grower and lends itself well to shearing.

Taxus baccata repandens. *Spreading English Yew.* Of graceful, spreading form. The most prostrate of all the Yews; one of the finest because of its adaptability to shade or sunlight.

Bulk's Hardy Roses

R OSES—the mere name is an inspiration to garden lovers. Nothing can take the place of the Rose. Almost every home has room for at least a few. Roses will grow in any fertile soil, but are much improved in bloom, fragrance, and beauty by rich soil, liberal fertilizing, and good cultivation. Branches should be well cut back early each spring.

Fruits

In the extremities of the lawn or upon the adjoining lot, plant fruit trees. They will bountifully reward you in the fruit they yield, which you will enjoy eating right from the trees or in winter as preserves and jam. The fruit-garden can easily be made a part of the scheme for beautifying your property. Flowers along the walk to the orchard will brighten the way and provide blooms for cutting.

Spraying of Fruit Trees

For best results we recommend three sprayings: First, during the winter; second, after the blossoms fall; and third, about two weeks later. This will control the most prevalent insects and fungous diseases attacking fruit trees on Long Island.

A pleasing medley of color afforded by Azaleas. The foliage tones of the various greens quiet the brilliant colors and afford a restful background.

A flower-bordered walk leading to a nook or secluded retreat is always interesting. Perhaps you have just the place for a planting of this type.
